I forgot to add. How can you justify allowing MS anywhere near the education market (schools)? Allowing a monopoly into the Apple computer's only real sales market, what kind of politics are you playing?

I can't believe you gave the victory to MS??????

A proven monopoly with approximately 95% of the world's desktops running Windows!

You had the case won and should have put serious restrictions on Microsoft without ALL of the loopholes that are in the current agreement.

My California congress people will certainly hear from me regarding your extremely poor decision!

Success, Achievement and Fulfillment
